Designs inspired by the world's most iconic cities

Welcome to Carbon Elevate Your Space with Timeless Elegance

At Carbon, we believe that every space tells a story. With over eight years of expertise in the porcelain tile industry, we are dedicated to crafting products that combine sophistication with durability. Our commitment to excellence has established us as a trusted name in the industry, exporting our exquisite tiles across Europe, Latin America, and select regions in the Middle East.

Our journey began with a vision to redefine the art of tiling, and today, we take pride in offering a diverse range of premium porcelain tiles that cater to varied tastes and applications. Whether you are designing a contemporary urban retreat, a classic living area, or an innovative commercial space, our tiles are designed to inspire and transform.

At Carbon, we blend innovation with tradition, ensuring each tile reflects our passion for quality and style. Explore our catalog and discover how our products can bring unparalleled beauty and function to your projects.

Introducing Global Elegance Designs Inspired by the World's Iconic Cities

Step into a world of refined sophistication with Carbon's latest collection: Global Elegance. This exclusive range of porcelain tiles draws inspiration from the architectural marvels and timeless beauty of the world's most iconic cities.

Each design in the Global Elegance collection is a tribute to the distinct character and charm of celebrated global landmarks. From the sleek lines of modern metropolises to the classic elegance of historic districts, our tiles encapsulate the essence of urban landscapes that have shaped the world's architectural heritage.

Whether it's the refined grace of Parisian avenues, the bold modernity of New York's skyline, or the serene elegance of Rome's ancient facades, our tiles bring these legendary aesthetics into your space. Each pattern and texture is meticulously crafted to embody the spirit of these cities, creating an ambiance that transcends geographical boundaries.
